Journal of Biochemical and Biophysical Methods, 20 (1990) 357–359
Elsevier

Contents of Volume 19

No. 1

Mini Review
W.W. Van Osdol, R.L. Biltonen and M.L. Johnson (U.S.A.)
Measuring the kinetics of membrane phase transitions 1

Research Articles
W. Ansorge, H. Voss, U. Wirkner, C. Schwager, J. Stegemann, R. Pepperkok, J. Zimmermann and H. Erfle (F.R.G.)
Automated Sanger DNA sequencing with one label in less than four lanes on gel 47

K.J. Mussar, G.J. Murray, B.M. Martin and T. Viswanatha (Canada, U.S.A.)
Peptide: *N*-glycosidase F: studies on the glycoprotein aminoglycan amidase from *Flavobacterium meningosepticum* 53

C.S. Nielsen, P.H. Hansen, A. Lihme and P.M.H. Heegaard (Denmark)
Real time monitoring of acylations during solid phase peptide synthesis: a method based on electrochemical detection 69

No. 2

Research Articles
T. Cserháti and K. Valko (Hungary)
Relationship between the hydrophobic and hydrophilic molecular parameters of some synthetic nucleosides, determined by means of adsorptive and reversed-phase thin-layer chromatography 81

R. Leoncini, R. Guerranti, R. Pagani and E. Marinello (Italy)
An improved method for purification of L-threonine deaminase from rat liver 97

R. Christova and Z. Galcheva-Gargova (Bulgaria)
A simple method for isolation of DNA fragments associated with the nuclear lamina in vivo 107

A. Missbichler, E. Hartter, W. Woloszczuk and F. Pittner (Austria)
Determination of α-human atrial natriuretic peptide (α-hANP) in urine using combination of HPLC with RIA strongly indicates non-immunoreactive metabolites 113

F. Cabré, M. Cascante and E.I. Canela (Spain)
Application of inverse regression for estimating molecular masses and Stokes radii of globular proteins by gel filtration chromatography 123

A. Önal, A. Öğüş and D. Kısakürek (Turkey)
A new electrochemical method for the production of stable ascorbate free radicals 137

S. Bromberg, D.S. Burz and N.M. Allewell (U.S.A.)
Use of analytical gel chromatography to analyze tertiary and quaternary structural changes in *E. coli* aspartate transcarbamylase 143

0165-022X/90/$03.50 © 1990 Elsevier Science Publishers B.V. (Biomedical Division)

T.M. Stepanik and D.D. Ewing (Canada)
Coisolation of glutathione peroxidase, catalase and superoxide dismutase from human erythrocytes 157

No. 3

Research Articles
A.A. Calderón, M.A. Pedreño, A. Ros Barceló and R. Muñoz (Spain)
A spectrophotometric assay for quantitative analysis of the oxidation of 4-hydroxystilbene by peroxidase-H_2O_2 systems 171

B.A. Shirley and D.V. Laurents (U.S.A.)
Purification of recombinant ribonuclease T_1 expressed in *Escherichia coli* 181

H. Van Faassen and R. Berger (The Netherlands)
Separation of different forms of *S*-adenosylmethionine synthetase by fast protein liquid chromatography 189

A. Andreoni, U. Bernini, M. Mastrocinque, E. Quarto and P. Russo (Italy)
Quantitative measurements of porphyrin pigments in tissues via photoacoustic spectroscopy 195

I.A. Abusugra, T. Linné and M. Berg (Sweden)
Simplified polyacrylamide gel electrophoresis and silver staining for analysis and preparation of influenza virus RNA segments 207

S.A. Thorén, J. Ankerst and H.O. Sjögren (Denmark, Sweden)
A microcalorimetric vessel for monitoring cytotoxic reactions in the micro–submicrowatt region 217

J.R. Vanfleteren and K. Peeters (Belgium)
Chromatographic recovery of polypeptides from copper-stained sodium dodecyl sulfate polyacrylamide gels 227

P. Mattsson, S. Meklin and T. Korpela (Finland)
Analysis of cyclomaltodextrin glucanotransferase isoenzymes by isoelectric focusing in immobilized pH gradients 237

D. Le Goff, A. Nouvelot and J.-L. Chermant (France)
Determination of size and molecular weight distributions of lipoproteins using automatic image analysis and density gradient ultracentrifugation 247

Short Note
J.M. Campbell, T.A. Bacon and E. Wickstrom (U.S.A.)
Oligodeoxynucleoside phosphorothioate stability in subcellular extracts, culture media, sera and cerebrospinal fluid 259

Book Review 269

Corrigendum 271

Announcements 273

No. 4

Research Articles

F.J. Stevens (U.S.A.)
Fractionation of macromolecules in an alternating transverse electric field: simulation of the method 275

C. Bignon, M. Roux-Dosseto, J.-C. Lissitzky and P.-M. Martin (France)
Modulable Southern and Northern blot hybridization apparatus for routine screening of gene amplification and expression 293

L. Holmquist, G. Agrup, H. Anundi and O. Vesterberg (Sweden)
High performance concentration and gel filtration of rat urinary protein allergens 303

H. Van Faassen, I.E.T. Van den Berg and R. Berger (The Netherlands)
Purification of human liver fumarylacetoacetase using immunoaffinity chromatography 317

B. Presnell, A. Conti, G. Erhardt, I. Krause and J. Godovac-Zimmermann (Australia, Italy, F.R.G.)
A rapid microbore HPLC method for determination of primary structure of β-lactoglobulin genetic variants 325

M. Shimizu, K. Sekine and T. Iwaguchi (Japan)
A reverse effect of in vitro and in vivo concanavalin A-induced spleen cells on anti-sheep red blood cells response detected with a new method based on flow cytometry 335

P.K. Sinha, E. Köttgen, M. Stöffler-Meilicke, E. Gianazza and P.G. Righetti (F.R.G., Italy)
Two-dimensional maps in very acidic immobilized pH gradients 345

Short Note

R.C. YashRoy (Canada)
Determination of membrane lipid phase transition temperature from ^{13}C-NMR intensities 353
